

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by DE10142923 (Boll).

Boll discloses a hybrid vehicle comprising a fuel cell 3, a combustion engine 5, generator 6, electric motor 7, a common cooling device 8 for both the fuel cell 3 and the combustion engine 5, control devices 11, 11a acting as the valves for controlling the heat flow from heat conducting medium 10 to the cooling device 8, combustion engine 5 and the fuel cell 3.

Claims 2-4, 8-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Khelifa and Reddy disclose cooling/heating circuits for hybrid vehicle having fuel cell.
